Technology*

ATG®'S NEW AND IMPROVED AD-APT® COOLING TECHNOLOGY RAISES THE BAR FOR WEARER COMFORT

One recurring theme arises in each and every conversation about gloves we have: comfort.

Almost 100 per cent of glove wearers claim that comfort is their number one priority when choosing gloves, with the key challenge being hot hands. Inspired to find a solution, ATG® developed AD-APT® that they integrated into the iconic MaxiFlex®.

Many will already be familiar with AD-APT®, having experienced cooler, drier hands while wearing MaxiFlex® gloves.

ATG® have recently improved their patented AD-APT® technology, making the gloves cooler and more comfortable than ever before. They've also extended the range of gloves that include AD-APT® to MaxiFlex Cut™ and MaxiCut® Ultra™.

Hands in AD-APT® gloves are 65% cooler than hands in their equivalent non-AD-APT® gloves, making the world's coolest gloves even cooler.

AD-APT® works in partnership AIRtech® - which provides 360° breathability - to regulate and ventilate hot air and moisture, keeping your hands cool, dry and productive even in tough, hot conditions.

Try today and feel the difference.

For more information, please get in touch.

HandCare®
DERMATOLOGICALLY ACCREDITED

Working with the Skin Health Alliance, ATG® have ensured that their AD-APT® technology platform is dermatologically accredited.

The accreditation serves as a guarantee that the technology is skin safe, that the science and research behind AD-APT® is robust and that it meets international regulatory standards.
